1 October 2025

The below update applies to the QSuper Product Disclosure Statement for Income Account and Lifetime Pension issued on 1 July 2025 (PDS).

Please read this important update with the PDS.

Family Law Split

On 1 April 2025, the *Family Law (Superannuation) Regulations 2025* increased the minimum account amount required to enable a Family Law split of an Income account from \$5,000 to \$10,000.

The below update applies to page 126 of the PDS.

We have highlighted the updated amount in red, so that you can easily see what's changed. This important update should be read in conjunction with the PDS.

If you separate from your spouse (including same-sex and de facto), family law legislation means you may be able to split the super either of you hold in an Income account with a value of \$10,000 or more. If we need to split your account, and after we receive all the required information and forms, we'll generally open an Accumulation account for your former spouse if they don't already have one. In accordance with the relevant agreement or Court order, we'll transfer their entitlement into that account and make a corresponding reduction to the amount in your super.

Because the legislation around splitting your super is complex and may have financial and tax implications for you, it's a good idea to get financial and legal advice.

Investment fees and costs and transaction costs

The investment costs component of investment fees and costs, and the transaction costs, are generally calculated based on actual costs incurred in the previous financial year. Performance fees are generally calculated based on an average of the previous 5 financial years of performance fees. Where actual amounts are not available, reasonable estimates are used.

For the PDS, we calculated investment fees and costs and transaction costs for the 2024–25 financial year before the end of the financial year, using the investment cost, transaction cost and performance fee information that was available at the time it was prepared.

Following the end of the 2024–25 financial year, we recalculated these amounts, using additional investment cost, transaction cost and performance fee information which became available after the end of the financial year and relying less on reasonable estimates.

As a result, the investment fees and costs and transaction costs for several of our investment options have been updated.

QSuper Product Disclosure Statement for Income Account and Lifetime Pension

The below updates apply to pages 72 to 77, 84, 85 and 87, 104 to 108, 113 and 114 of the PDS.

We have highlighted the updated amounts in red, so that you can easily see what's changed. This important update should be read in conjunction with the PDS.

Example of annual fees and costs for superannuation products - Income accounts

This table gives an example of how the ongoing annual fees and costs for the Balanced Risk-Adjusted option for this superannuation product can affect your superannuation investment over a 1-year period. You should use this table to compare this superannuation product with other superannuation products.

EXAMPLE – Income account Balanced Risk- Adjusted option	Balance of \$50,000	
Administration fees and costs	0.11% p.a. ¹ of your account balance plus \$1.20 p.w.	For every \$50,000 you have in the superannuation product you will be charged or have deducted from your investment \$55 in administration fees and costs, plus \$62.40 regardless of your balance.
PLUS Investment fees and costs	0.41% p.a.	And , you will be charged or have deducted from your investment \$205 in investment fees and costs.
PLUS Transaction costs	0.05% p.a.	And , you will be charged or have deducted from your investment \$25 in transaction costs.
EQUALS Cost of product		If your balance was \$50,000 at the beginning of the year, then for that year you will be charged fees and costs of \$347.40 for the superannuation product.

Note: *Additional fees may apply. The above table showing an example of annual fees and costs for our Balanced Risk-Adjusted option is illustrative only and based on the assumptions listed. The actual amount of fees and costs can vary depending on your investment option and other factors.

Cost of product for 1 year

The cost of product gives a summary calculation about how ongoing annual fees and costs can affect your superannuation investment over a 1-year period for all superannuation products and investment options. It is calculated in the manner shown in the 'Example of annual fees and costs'.

The cost of product information assumes a balance of \$50,000 at the beginning of the year. (Additional fees such as a buy-sell spread may apply. Refer to the Fees and costs summary for the relevant superannuation product or investment option.) You should use this figure to help compare superannuation products and investment options.

Investment option	Cost of product ¹
High Growth	\$467.40
Balanced	\$442.40
Conservative-Balanced	\$432.40
Conservative	\$417.40

Self Invest ²	\$490.25

¹ A portion of the administration fees and costs are paid from the Fund's reserves, being 0.05%, which for a \$50,000 balance is \$25 of fees that will therefore not be deducted from your account. 2 The total cost of product for Self Invest includes fees and costs for amounts not invested in Self Invest. For more information on how we calculate the total cost of product for Self Invest, please see the Example of annual fees and costs for Self Invest in our Self Invest Guide.

¹ A portion of the administration fees and costs are paid from the Fund's reserves, being 0.05%, which for a \$50,000 balance is \$25 of fees that will therefore not be deducted from your account. Please see 'Additional explanation of fees and costs' for more information.

Investment fees and costs and transaction costs for each investment option

We charge investment fees and costs to manage each investment option. The investment fees and costs include the internal costs of managing investments and may include investment project related costs.

The investment fees and costs and transaction costs are estimates only. The investment fees component of investment fees and costs is estimated based on recent experience and our expectations for the financial year ending 30 June 2026. The investment costs component of investment fees and costs, and the transaction costs, are generally calculated based on the actual costs incurred for the year ending 30 June 2025. Where actual costs were not available, we've used reasonable estimates of actual costs.

The actual amount you'll be charged will depend on the actual fees and costs the Trustee incurs in managing the investment option.

Investment fees and costs include an amount for performance fees, which are calculated differently. We describe performance fees and set out the performance fees for each option in the table on page 108.

Performance Fees

We generally incur investment fees and costs from our investment managers based on a percentage of the market value of the funds managed. In some cases, managers may have a base fee plus a performance fee that we pay if assets they manage beat certain performance targets.

Performance fees form part of investment fees and costs. They're part of the amounts we show you as investment fees and costs in this PDS.

We believe that performance fees encourage our investment managers to try to deliver sustained investment performance. Performance fees are difficult to predict because they're based on future investment performance of many underlying investments. They're not based on the performance of the whole investment option.

Where possible, we show you performance fees that are an average of the previous 5 financial years.

For investment options that were available to Super Savings members before 1 July 2024, the performance fees shown for these options are an average of the previous 5 financial years, based on Super Savings performance fees. Australian Retirement Trust Super Savings started on 28 February 2022 and adopted the investment strategy of the former Sunsuper for life. For periods before this date, we've used equivalent Sunsuper for life fee data.

Our High Growth Index option started on 1 July 2024. Performance fees for that option are based on actual costs for the previous financial year and reasonable estimates where actual costs were not available.

The actual performance fees you are charged may be higher or lower because of performance by various underlying investment managers.
